## Extracting using Morphy Leads Finder

1. Enter the keyword(s) in the **Keywords** section. Enter one keyword per line, if you are searching based on multiple keywords. For example, If you want to extract information about *the schools, colleges and universities in Canada*, type *schools* then press the **Enter** key and type *colleges* etc.

**Keywords (3)**

schools  
colleges  
universities

2. Enter the location(s) in the **Locations** section. Enter one location per line, if you are searching based on multiple locations. For example, If you want to extract information about *the schools, colleges and universities in Canada and the UK*, type location in the “City,State,Country” format. Example – type *Shoreditch,London,united kingdom* then press ENTER key and then type *dallas,texas, united states*. Donot enter simply the country name in location box.

**Locations (2)**

shoreditch,london,united kingdom  
dallas,texas,united states

3. After entering the keyword(s) and location(s) , click “Extract Email” check box and then click **Start extracting** button. The **start extracting** button changes to the **Stop extracting** button. The tool starts extracting data based on the data you have given and displays the results in a table. The details extracted

includes Keyword, Location, company name, website url, Phone number, Email ids, Address, City, State, Pincode, no.of ratings and reviews and content ID.

4. Click on **Stop extracting** once you get enough records.
5. Export the extracted data into excel or csv file by clicking on the **Download** button.
